EDUCATION

FPT University | 2021 - 2025

Major: Information Technology

Degree classification: Good

SKILLS

Programming Languages: Java, JavaScript

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, RESTful API

Database: MySQL, MongoDB

Tools: VS Code, Git/GitHub, Postman, etc.

Self-learning new technologies

Reading IT documents in English

CERTIFICATES

Coursera | 09/2023

WORK EXPERIENCE

FPT Software Da Nang | 09/2024 - 12/2024

Software Engineer Intern

- Completed internship training program at FPT Software.
- Trained in Java, HTML, CSS, and SQL Server.
- Worked in a team, followed working processes, and improved problem-solving and communication skills.

PROJECT

Self-drive Car Rental Platform | 09/2025 - 12/2025

Full-stack Developer (Team Project)

- Developed a self-drive car rental platform connecting vehicle owners and renters.
- Built frontend interfaces with React.js and backend RESTful APIs with Node.js and Express.js.
- Implemented renter-facing features including landing page, vehicle search, filtering, and reviews.
- Integrated external AI APIs for review moderation, vehicle recommendations, and AI chat support.

Technologies: React.js, Node.js, Express.js, Sequelize, MySQL, Tailwind CSS, RESTful API

Cinema Booking Website – Cinepa | 05/2024 - 08/2024

Full-stack Developer (Team Project)

- Built a cinema ticket booking platform supporting multiple cinema owners.
- Developed the landing page UI using HTML and CSS.
- Implemented user registration, login, and email OTP verification.
- Built cinema-owner management features for cinemas and showtimes using JSP/Servlet.

Web Design for Everybody: Basics of Web Development & Coding

Coursera | 01/2024

Software Development Lifecycle

Coursera | 07/2024

CertNexus Certified Ethical Emerging Technologist

INTERESTS

- Learning new technologies
- Programming
- Reading books
- Traveling

Technologies: Java Web (JSP/Servlet), HTML, CSS, SQL Server

Travel Companion App | 05/2025 - 08/2025

Full-stack Developer (Team Project)

- Developed a cross-platform mobile application connecting travelers with similar itineraries and interests.
- Built the mobile UI using React Native and Expo.
- Designed and developed backend RESTful APIs using Node.js and Express.js.

Technologies: React Native, Expo, Node.js, Express.js, MongoDB, RESTful API
